## Education

2015 – 2018 **PhD in Applied Mathematics**, *CentraleSupélec, Université Paris-Saclay*, France.
Title: Contribution to the improvement of meshless methods applied to continuum mechanics.

- Built a common theoretical framework to analyze and compare meshless discretizations.
- Characterization of conditions for conservation and consistency of operator-based discretizations.
- Applications to fissure initiation and propagation.

2010 – 2014 **Master's level engineering school**, *École Centrale Paris*, France.
Specialised in Numerical Analysis, Simulation and Optimization.

## Professional Experience

Since 2015 **Research engineer**, *ESI-Group*, Software Publisher, specialized in Simulation and Virtual Prototyping, Rungis, France.

- **PhD thesis** *(3 years)*: Joint funding with the French public agency *ANRT*.
- Leader of the **Horizon 2020** EU project **MADELEINE** *(3 years)*
  - Development and implementation of coupling methods for Fluid Structure Interaction
  - AeroStructural adjoint optimization of a business jet aircraft wing.
  - Simulation and Optimization of the manufacturing of a high-pressure turbine blade.
- Development and implementation of methods for mesh morphing and moment computation.
- Application of optimal transport GPU-accelerated tools for Reduced Order Modelling and fast interpolation in parametric space.

Feb – Jul 2013 **Research intern**, *Indian Institute of Technology Bombay*, Mumbai, India.
Development of a parallel (MPI) auto adaptive meshless DSMC code. Application to the simulation of heat exchange and sizing of the heat shield of re-entry vehicles.

Jul 2012 – Jan 2013 **R&D intern**, *Air Liquide*, Industrial gas world leader, France.
Redesign of the thermodynamic model and development of a modelling and simulation code for the filling process of gas vessels. Comparison with in-situ measurements and optimization of the filling process.

## Language and computer skills

**Programming** Numerical programming (FORTRAN, C++, Python).
Shared-memory (OpenMP) and distributed-memory (MPI) parallel programming.

**French** Native language

**English** Fluent. C2 equivalent in the CEFR.

## Selected Publications
